PROFILE

Backend-leaning Full Stack Engineer with 2+ years of production experience on Laravel/PHP platforms. Delivered 167+ merged pull requests on a live education platform covering tutor operations, administrative reporting dashboards, and automated WhatsApp notifications. Works across MySQL and PostgreSQL, REST APIs, Next.js/React, Docker, and automated feature testing; also ships Python ML inference APIs and Odoo ERP integrations.

EXPERIENCE

Software Engineer | Neo Edukasi (CV. Cendekia Karya) Karanganyar, Indonesia | Jan 2024 - Present

- Delivered 227+ merged pull requests for a production Laravel platform, engineering tutor workflows, dynamic reporting dashboards, automated WhatsApp notifications, and security audit patches.
- Built and maintained core backend validation pipelines; refactored cache layers and optimized MySQL indexes to decrease query load times by up to 40%.
- Developed high-performance marketing landing pages using Astro and React, elevating PageSpeed Insights scores from 65 to 95+ and reducing bounce rate by 20%.

Machine Learning Cohort | Bangkit Academy (Google, GoTo, Traveloka) Remote / Bandung, Indonesia | Sep 2024 - Dec 2024

- Engineered and deployed Flask REST APIs integrating TensorFlow nutrition models, YOLO height detection, and Vertex AI RAG chatbot for the StunBy platform.

Teaching Assistant, Web Programming Course | Sebelas Maret University Surakarta, Indonesia | Feb 2025 - Jul 2025

- Instructed 60+ undergraduate students in full-stack web development, client-server architecture, RESTful API design, and modern frontend-backend integration.

Assistant Lecturer, Database Course | Sebelas Maret University Surakarta, Indonesia | Sep 2024 - Jan 2025

- Mentored 50+ undergraduate students in relational schema design, SQL query optimization, and transaction management.

PROJECTS

AinyLingo: Adaptive AI Language Learning Platform | Next.js 16, TypeScript, PostgreSQL, Drizzle ORM, RAG, Playwright | GitHub 2026

- Architected a full-stack adaptive learning platform featuring real-time AI streaming tutors via RAG, spaced repetition systems (SRS), automated billing reconciliation, and end-to-end Playwright tests.

Mobile Laundry Android Application | Kotlin, Jetpack Compose, Android SDK, REST API | GitHub 2025

- Built a modern Android application using declarative Jetpack Compose UI and ViewModel architecture for customer order flows and laundry status tracking.

Recycle Reward Web Application | Laravel, Filament, PHP, MySQL | GitHub 2024

- Built a full-stack recycling management system with Laravel and Filament featuring reward point redemption, community complaint tracking, and automated feature and integration tests.

EDUCATION

Bachelor of Computer Science, Informatics | Sebelas Maret University Surakarta, Indonesia | Aug 2022 - Expected Jul 2026
GPA: 3.75/4.00. Focus: Software Engineering, Database Systems, Machine Learning, and Applied Statistics.

SKILLS

Languages: PHP, TypeScript, JavaScript, Python, Kotlin, Dart, SQL, HTML, CSS
Web & Mobile: Laravel, REST API, React, Next.js, Android (Jetpack Compose), Flutter, Astro, Tailwind CSS, Filament
Databases & Systems: MySQL, PostgreSQL, Query Optimization, Database Indexing, Schema Design, Caching
Tools & Testing: Git, GitHub, Docker, Linux, CI/CD, Playwright E2E Testing, Automated Testing, MCP Server, LaTeX
Spoken Languages: Indonesian (Native), English (Professional Working Proficiency)

TRAINING AND CERTIFICATIONS

Certifications: Alibaba Cloud Certified Developer; Cisco CCNAv7: Introduction to Networks; Bangkit Academy Graduate in Machine Learning (Google, GoTo, Traveloka); AWS Cloud Computing (AWS x Dicoding).
Training: Fullstack Web Development Bootcamp (Progate); IDCamp x KADIN Front-End Developer; IDCamp Multiplatform Application Development.
