PROFILE

Backend-leaning Full Stack Engineer with 2+ years of production experience on Laravel/PHP platforms. Delivered 167+ merged pull requests on a live education platform covering tutor operations, administrative reporting dashboards, and automated WhatsApp notifications. Works across MySQL and PostgreSQL, REST APIs, Next.js/React, Docker, and automated feature testing; also ships Python ML inference APIs and Odoo ERP integrations.

EXPERIENCE

Web Developer | Neo Edukasi (CV. Cendekia Karya) Karanganyar, Indonesia | Apr 2024 - Present

- Delivered 167+ merged pull requests for a production Laravel education platform, covering tutor operations, administrative reporting dashboards, automated WhatsApp notifications, and security audit patches.
- Built and maintained backend services and validation pipelines across session scheduling, attendance tracking, and administrative data operations.
- Refactored backend services and cache layers with automated feature tests, and optimized MySQL indexes and aggregation queries across recurring reporting workflows.

Machine Learning Cohort | Bangkit Academy (Google, GoTo, Traveloka) Remote / Bandung, Indonesia | Sep 2024 - Dec 2024

- Engineered and deployed Flask REST APIs integrating TensorFlow nutrition models, YOLO height detection, and Vertex AI RAG chatbot for the StunBy platform.

Assistant Lecturer, Database Course | Sebelas Maret University Surakarta, Indonesia | Sep 2024 - Jan 2025

- Mentored 50+ undergraduate students in relational schema design, SQL query optimization, transaction management, and database troubleshooting.

Web Developer Intern | Neo Edukasi (CV. Cendekia Karya) Karanganyar, Indonesia | Jan 2024 - Mar 2024

- Built a responsive marketing landing page with Astro, React, and Tailwind CSS, improving PageSpeed Insights score from 65 to 95+ and reducing bounce rate by 20%.

PROJECTS

jev-judge: TypeSafe Decision Model MCP Server | TypeScript, Node.js, MCP Protocol, CLI | GitHub 2026

- Built a universal Model Context Protocol (MCP) server and CLI for calibrated evaluation, automated code reviews, and deterministic guardrail gating across AI agents (Claude Code, Cursor, OMP).

Odoo Indonesia CoreTax DJP Synchronization | Python, Odoo ERP, PostgreSQL, XML-RPC | GitHub 2026

- Engineered an enterprise ERP synchronization module implementing Indonesian DJP CoreTax electronic invoice specifications and automated account move validation.

Recycle Reward Web Application | Laravel, Filament, PHP, MySQL | GitHub 2024

- Built a full-stack recycling management system with Laravel and Filament featuring reward point redemption, community complaint tracking, and automated feature and integration tests.

EDUCATION

Bachelor of Computer Science, Informatics | Sebelas Maret University Surakarta, Indonesia | Aug 2022 - Expected Jul 2026

GPA: 3.75/4.00. Focus: Software Engineering, Database Systems, Machine Learning, and Applied Statistics.

SKILLS

Languages: PHP, TypeScript, JavaScript, Python, SQL, HTML, CSS

Backend & Web: Laravel, REST API, Node.js, Next.js, React, Astro, Tailwind CSS, Odoo ERP, Filament

Databases & Systems: MySQL, PostgreSQL, Query Optimization, Database Indexing, Schema Design, Caching

Tools & Testing: Git, GitHub, Docker, Linux, CI/CD, Playwright E2E Testing, Automated Testing, MCP Server, LaTeX

Spoken Languages: Indonesian (Native), English (Professional Working Proficiency)

TRAINING AND CERTIFICATIONS

Certifications: Alibaba Cloud Certified Developer; Cisco CCNAv7: Introduction to Networks; Bangkit Academy Graduate in Machine Learning (Google, GoTo, Traveloka); AWS Cloud Computing (AWS x Dicoding).

Training: Fullstack Web Development Bootcamp (Progate); IDCamp x KADIN Front-End Developer; IDCamp Multiplatform Application Development.
